**Subject:** Question on Private Well Testing [Hurricane Harvey Response]

Hello Local Emergency Planning Committee Members,  
RE: Question on Private Well Testing  
Our Community Liaison group with US EPA in Houston would like to know if your county is offering free water testing for residents with private wells. Are your county Health Department(s) or other departments offering this service? If so, for which test(s)?  
If you can please give us a quick response to this message, indicating whether this service is offered in your county--or forward it to the correct contact who can reply--we'd appreciate it. Reach us with questions at 281.983.2143  
Thank you,  
Michelle Kerr  
Community Liaison for Hurricane Harvey  
U.S. Environmental Protection Agency
